Measure Names

Mrp

The chart displays the price of Apple products over time. The Y-axis represents the Maximum Retail Price (Mrp) in thousands of rupees (K), ranging from 0K to 150K. The X-axis lists the product names. The price starts at approximately 80K, fluctuates between 50K and 100K, then rises to a peak of 150K. After this peak, the price drops sharply to around 40K and then stabilizes at 50K.
